Subject: Extension to submit information required by SUA-1597, LC 10.14, para 2

Mike:

Your request for an extension to submit information pertinent to Materials License SUA-1597, License Condition 10.14, paragraph 2, is approved for 6 months from the one-year anniversary of the commencement of operations on April 15, 2014. Accordingly, the information should be provided to the NRC on or before October 15, 2015.

In accordance with 10 CFR 2.390 of the NRC's "Agency Rules of Practice and Procedure," a copy of this correspondence will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records component of NRC's Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely;

Ron C. Linton

Subject: RE: Report for LC 10.14

Ron,

Given that Uranerz is focusing on employee safety in trying to get the HP Designee moving forward after almost a year of being in limbo, the fact that this specific license condition is not backed by any precedent or guidance, and the high priority that the NRC has placed on addressing issues of this type, Uranerz is requesting that until the high priority health physics issues are addressed by the NRC staff, additional laboratory data is obtained, and Uranerz has thoroughly reviewed our data and any other information that may be available, the response to this license condition be extended at a minimum of six months.

Thanks,

Mike

Subject: Report for LC 10.14

Dave,

As per our discussion last week regarding the report for LC 10.14, I said I would let you know the status of submittal. The report has been drafted but is still being reviewed. Considering that there is no precedent or guidance related to this condition, Uranerz requires more time to review and edit the report before it can be submitted to the NRC.

If you have questions, please don't hesitate to contact Mike Thomas or myself.

Thank You
