Division of Fuel Facility Inspection Update, Inspection Findings and Performance Trends

FCIX 2015

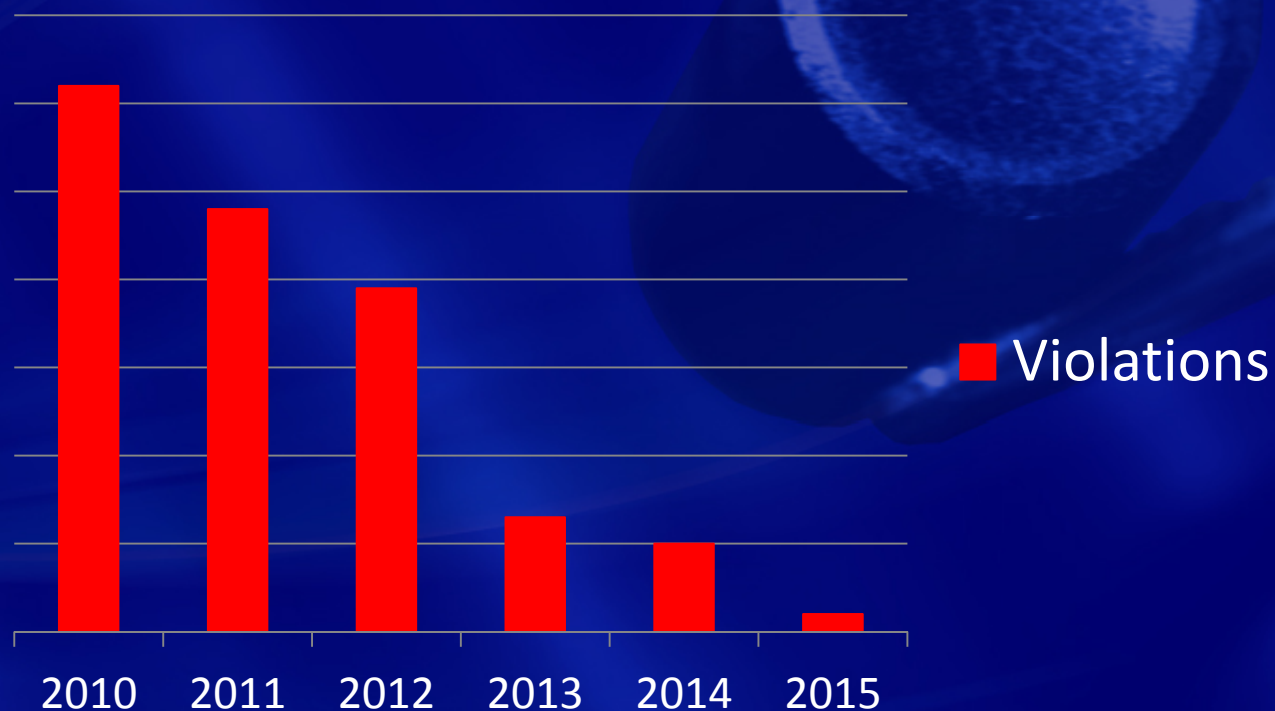

Division of Fuel Facility Inspection

Overview

- A Look Back at Inspections and Performance
- Continuous Program Improvements
- Current Performance Observations
- A Look to the Future
- Closing Tips

A Look Back at Inspections

- Calendar year 2014 LPR results
 - No Areas Needing Improvement

Continuous Improvements

- Division of Fuel Facility Inspection Re-organization
 - Enhancing Skills and Leadership
 - More predictable and efficient inspection program

Continuous Improvements

- Completed consolidation of inspections
 - Material Control and Accounting
 - Nuclear Criticality Safety
 - Information Security
- New Activities
 - Publicly Available Cover Letters

Performance Observation Highlights

- Feedback from team inspections has been positive
- Results of recent inspections
 - Unevaluated Process Upsets
 - Safety Control Effectiveness issues

Closing Safety Tips

- Are management measures effectively demonstrating that IROFS will perform as intended?
- Are process parameters adequately controlled to ensure functionality of safety controls?
- Are functional verifications testing the safety functions of control, instead of individual components?
