[4:27 p.m.]

CHAIRMAN SELIN: Good afternoon.

We have an affirmation session today with two items before us.

Doctor Bates?

DR. BATES: Mr. Chairman, the first item is SECY-94-196. It's the Final Rule Amending Part 110 Concerning Exports of Alpha-Emitting Radionuclides, Tritium and Transuranic Isotopes.

The Commission is being asked to approve a final rule amending the export regulations in 10 CFR Part 110 to: number one, conform them to export control guidelines of the international Nuclear Suppliers Group with respect to tritium and certain specified alpha-emitting nuclides; two confirm them to the controls of the Coordinating Committee for Multilateral Export Controls for exports of several transuranic isotopes; three, adjust annual limits on exports of Canadian-origin uranium to conform to the U.S.-Canada Agreement for Cooperation; and, four, revise the language in Appendix A of Part 110 to describe more precisely the reactor components subject to NRC export licensing jurisdiction.

All Commissioners have approved the amendments to the Part 110 as final.
