Cc: Towey, Megan
Subject: CBS News FOIA Request - Depleted Uranium **Related Case:**

Dear NRC FOIA Officer,

This is a request under the Freedom of Information Act, 5 U.S.C. § 552. I would like to request documents related to the following bullet points, as discussed a conference call with NRC staff today - June 4, 2015.

- Any information generated by the NRC related to the safe handling, storage and transportation of Depleted Uranium in/from NRC licensed facilities that was used to determine current NRC regulatory requirements (ie. studies done that formed the basis of those requirements)
- IF the NRC regulatory requirements have changed in the past 15 years (since January 1, 2000), I request any information generated by the NRC related to the safe handling, storage and transportation of Depleted Uranium in NRC licensed facilities that was used to determine the previous NRC regulatory requirements, which the new requirements replaced (ie. studies done that formed the basis of those requirements)

In order to help to determine my status for purposes of determining the applicability of any fees, you should know that I am a member of the media and this request is made as part of news gathering and not for a commercial use. As such, I request a waiver of all fees for this request. Disclosure of the requested information to me is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the government and is not primarily in my commercial interest. If any fees are to be assessed, I ask that you contact me directly before any work is done on my behalf.

If my request is denied in whole or part, I ask that you justify all deletions by reference to specific exemptions of the act. I, of course, reserve the right to appeal your decision to withhold any information or to deny a waiver of fees.

Thank you for your consideration of this request.
