Subject: AIM 2020 comment for June 5, 2015

Good morning,

The next time we send people to some nuclear plant in distress, I believe it might be helpful to have people who are already familiar with these references:

(All from the American Concrete Institute, 1-248-848-3800)

Concrete Repair Manual, 4th Edition, 2013, 2363 pages, (CD \$249; or hard copy \$259; or CD + hard copy \$359)

546R-14: Guide to Concrete Repair, 2014, 70 pages, \$99.50

562-13: Code Requirements for Evaluation, Repair, and Rehabilitation of Concrete Buildings (ACI 562-13) and Commentary, 2013, 59 pages \$130.50

357.3R-14: Guide for Design and Construction of Waterfront and Coastal Concrete Marine Structures, 46 pages, \$85.50 (includes below-water inspection and repair of damaged structures)

Thank you,

Tom Gurdziel
