SUBJECT

5/28/15, 1:00PM, CONFERENCE CALL WITH NUCLEAR WASTE PARTNERSHIP, LLC TO DISCUSS REQUESTS FOR ADDITIONAL INFORMATION ON THE RH-TRU 72B TRANSPORTATION PACKAGE

SUMMARY

Nuclear Waste Partnership, LLC (NWP) requested a teleconference to discuss staff's criticality request for additional information in letter dated May 8, 2015. NWP wanted some clarification on the question and staff explained that the benchmarking as described in the application was not clear. NWP described that some of the parameters in the application are not relevant to this amendment and so can be ignored. Of the parameters described in the application, the EALF determines the USL and so is the bounding parameter used for comparison in the benchmarking. Staff requested that the application is updated with this clarification in their responses to the requests for additional information. NWP agreed and indicated that they would contact staff with a date in which they expect to have their responses prepared.
