Subject: Proposed Bell Bend Nuclear Reactor

Building another nuclear reactor at Bell Bend is ill-advised and unacceptable:

- 1) The proposed design by a French company is not approved for use in the U.S.
- 2) Using \$4.5 billion in federal subsidies to build a plant for the benefit of a corporation that will invest ZERO dollars in the project is unacceptable. NO CORPORATE WELFARE.
- 3) the existing Susquehanna plant generates 60 metric tons of nuclear waste a year and there is no plan for the additional nuclear waste that will be generated.
- 4) There is no plan or even an application for the millions of gallons of water per day the plant would require from the Susquehanna River Basin.
