KING OF PRUSSIA, PA 19406-2713

May 26, 2015

Docket No. 03016010
Control No. 586413

License No. 37-19062-01

Chad Lincoln
Safety Manager
Trumbull Corporation
P. O. Box 6774
225 North Shore Drive
Pittsburgh, PA 15212

SUBJECT: TRUMBULL CORPORATION, LICENSE RENEWAL, CONTROL NO. 586413

Dear Mr. Lincoln:

This refers to your application dated April 7, 2015, for renewal of your NRC license. Enclosed with this letter is the renewed license. **Based on the information provided by you in your e-mail dated April 29, 2015, we have removed from the license your facilities located at 1876 Power Station Highway, Mount Storm, West Virginia, as authorized location of use and storage. These facilities may be released for unrestricted use.**

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region I Office, Licensing Assistance Team, (610) 337-5239, so that we can provide appropriate corrections and answers.

The NRC expects licensees to conduct their programs with meticulous attention to detail and high standards of safety and compliance. Serious consequences to employees and the public can result from failure to comply with NRC requirements, therefore you must conduct your program according to NRC regulations, the conditions of your NRC license, and the representations made in your application. You must notify the NRC in writing if:

1. Your mailing address changes;
2. You decide to permanently cease the activities authorized by the license;
3. You decide to acquire licensed material in excess of the possession limits specified on the license;
4. You change the Radiation Safety Officer named on the license;
5. You change the name or ownership of your organization.

The NRC will continue to periodically inspect the conduct of your licensed activities to verify that the activities are conducted in full compliance with the regulatory requirements. Failure to conduct your program safely and in accordance with NRC regulations, license conditions, and the representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, imposition of a civil penalty, or an order suspending, modifying or revoking your license.

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14).

Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov; select **Nuclear Materials; Med, Ind, & Academic Uses**; then **Licensee Toolkits**, see our **toolkit index page**. You may also obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-866-512-1800. The GPO is open from 8:00 a.m. to 5:30 p.m. EST, Monday through Friday (except Federal holidays).

Thank you for your cooperation.

Sincerely,

Original signed by Sattar Lodhi
