Mr. Christopher G. Miller
Director, Division of License Renewal
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001

Subject: Submittal of Industry Comments on Structural Portions of the Draft Subsequent License Renewal (SLR) Generic Aging Lessons Learned (GALL) Report

Project Number: 689

Dear Mr. Miller:

In an April 8, 2015, public meeting with the U.S Nuclear Regulatory Commission (NRC), a request was made to provide industry feedback related to proposed changes to structural portions of license renewal guidance to account for subsequent license renewal (SLR).

On behalf of the nuclear energy industry, the Nuclear Energy Institute (NEI)¹ is providing the attached information for NRC consideration. We appreciate the opportunity to provide comments, as well as maintaining open discussions regarding the proposed changes to the structural Aging Management Programs (AMPs) for the new SLR GALL and would appreciate the opportunity to continue the technical dialogue with the NRC staff.

If you have any questions, please contact either me or Jerud Hanson (202-739-8053; jeh@nei.org).

Sincerely,

A handwritten signature in black ink, appearing to read "Jason Remer", is written over a light blue horizontal line.

Jason Remer

c: Mr. Steven D. Bloom, NRR/DLR/RSRG, NRC

¹ The Nuclear Energy Institute (NEI) is the organization responsible for establishing unified industry policy on matters affecting the nuclear energy industry, including the regulatory aspects of generic operational and technical issues. NEI's members include all entities licensed to operate commercial nuclear power plants in the United States, nuclear plant designers, major architect/engineering firms, fuel cycle facilities, nuclear materials licensees, and other organizations and entities involved in the nuclear energy industry.
