MEMORANDUM TO: Anthony J. Mendiola, Chief
Licensing Processes Branch
Division of Policy and Rulemaking
Office of Nuclear Reactor Regulation

FROM: Joseph A. Golla, Project Manager **/RA/**
Licensing Processes Branch
Division of Policy and Rulemaking
Office of Nuclear Reactor Regulation

SUBJECT: SUMMARY OF JUNE 2-4, 2015, ANNUAL MATERIALS
PROGRAMS TECHNICAL INFORMATION EXCHANGE
PUBLIC MEETING

On June 2-4, 2015, the U.S. Nuclear Regulatory Commission (NRC) staff hosted a Category 2 public meeting at the NRC headquarters in Rockville, Maryland, to discuss material program activities. Attendees included representatives from the Materials Subcommittee of the Pressurized Water Reactor (PWR) Owners Group (PWROG MSC), the Electric Power Research Institute's (EPRI's) Boiling Water Reactor (BWR) Vessel Internals Program (BWRVIP), EPRI's Materials Reliability Program (MRP), EPRI's Primary System Corrosion Research Committee, and EPRI's Welding and Repair Technology Center (WRTC).

The NRC staff and industry representatives discussed progress in materials programs designed to provide information related to stress corrosion cracking, reactor vessel surveillance, dissimilar metal welds, and vessel internals examination, among other topics. Presentations are available electronically in the NRC's Agencywide Documents Access and Management System (ADAMS) under Accession No. ML15156B051. The meeting notice and agenda are also available in ADAMS under Accession No. ML15131A410. A list of meeting attendees is enclosed.

Communications between the NRC staff and industry materials programs technical leads occurs on an ongoing basis during quarterly telephone calls and this annual meeting. Executive level interactions occur during a separate annual executive session and during a semi-annual telephone conference.

CONTACT: Joseph A. Golla, NRR/DPR
301-415-1002

The following new action items were noted:

Action for executive session:

- None

Action for quarterly call:

- MRP will investigate availability of INPO Engineering Programs document
- NRC will determine whether the staff will request MRP 227, Revision 1
- NRC staff will consider the applicability of low and high fluence surveillance capsules

Please direct any inquiries to Robert O. Hardies at 301-415-5802 or Robert.Hardies@nrc.gov.

Several comments and questions were received from members of the public during the meeting who were participating via teleconference. These were addressed by NRC technical staff members.

Project Nos. 669, 689, 691, 694, and 704
