LISLE, IL 60532-4352

JUN 10 2015

John Thornton  
Radiation Safety Officer  
Professional Service Industries, Inc.  
1901 South Meyers Road  
Suite 400  
Oakbrook Terrace, IL 60181

Dear Mr. Thornton:

Enclosed is Amendment No. 83 to your NRC Material License No. 12-16941-01 in accordance with your two letters dated March 23, 2015, with the exception of removing the 12000 SSG Simms, Fort Bliss, Texas, location of use from the license. Please also note that we have revised Item 9.C. in accordance with your October 26, 2012 and April 17, 2013 renewal applications, and updated the manufacturer/distributor to the name currently listed in the Sealed Source and Device registry. Changes made to your license are printed in **bold** font.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we may provide appropriate corrections and answers.

**To remove the 12000 SSG Simms, Fort Bliss, Texas, location of use from the above referenced license, please submit final close-out information for that facility, under a signed and dated cover letter.** Close-out information must include a list of all gauges used or stored at that facility, the last date on which those gauges were used or stored at the facility, the most recent leak tests for each of those gauges, and final disposition information for those gauges. If gauges are transferred to another location of use listed on this license, please provide that location. If a gauge is transferred to another radioactive materials licensee, please provide that licensee's NRC license number or a copy of its agreement state license authorizing possession of that gauge. Also provide a letter confirming receipt of the transferred gauge by the recipient licensee.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The enclosed document contains sensitive security-related information.  
When separated from this cover letter this letter is uncontrolled.

J. Thornton

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with Title 10 of the *Code of Federal Regulations* Section 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

A copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Sara A. Forster, M.S.
