

**UNITED STATES
NUCLEAR REGULATORY COMMISSION**
REGION IV
1600 E. LAMAR BLVD.
ARLINGTON, TX 76011-4511

June 12, 2015

Mr. Donald (Don) A. Verrill, Radiation Safety Officer
Cudd Pressure Control, Inc.
2820 Central Avenue, Suite D
Billings, MT 59102

SUBJECT: NEW LICENSE

Please find enclosed NRC License No. 25-35228-01. The license is issued under the following conditions:

- Your written description of the proposed storage security is documented as your storage commitment in License Condition 25.B. You committed to set up your storage location authorized in this license similar to your storage facility in Williston, North Dakota. Ensure that you submit the pictures of the storage authorized under your North Dakota Department of Health, Radioactive Material License 33-50720-01, Williston, North Dakota facility. NRC regulation requirements 10 CFR 20.1801, 1802 and 30.34(i) are the regulations regarding radioactive material storage & security. Ensure that your proposed storage meets these requirements while in use, transport & storage. You can find the regulations at: <http://www.nrc.gov/reading-rm/doc-collections/cfr/>.
- Non-routine maintenance **will not** be authorized on the new license issued June 12, 2015. Please submit your procedures in accordance with NUREG 1556 vol. 4, Appendix N, which lists the information needed to submit for authorization of non-routine maintenance operations. You can find NUREG 1556 vol. 4, Appendix N at: <http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1556/v4/sr1556v4.pdf>.
- **Cudd Pressure Controls, Inc.** is the only authorized entity of Cudd Energy Services on the NRC License. Please complete NUREG 1556 vol. 15, Appendix F to establish the legal entity information for your license. Any subsidiaries added as DBAs, will be required to be listed on the Appendix F form and submitted to the NRC for review. You can find NUREG 1556 vol. 15, Appendix F at: <http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1556/v15/>.

An environmental assessment for this licensing action is not required since this action is categorically excluded under 10 CFR 51.22(c)(14)(viii). You should review this license carefully and be sure that you understand all conditions. You can contact me at 817-200-1286 if you have any questions about this license.

The NRC needs your Taxpayer Identification Number in order to make payments (refunds). Please complete and return NRC Form 531, "Request for Taxpayer Identification Number," to the highlighted address in Item 5 on Form 531. NRC Form 531 can be found at:

<http://www.nrc.gov/reading-rm/doc-collections/forms/nrc531.pdf>.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's expectations for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

NRC expects licensees to conduct their programs with meticulous attention to detail and a high standard of compliance. Because of the serious consequences to employees and the public that can result from failure to comply with NRC requirements, you must conduct your radiation safety program according to the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, note that you must:

1. Operate by NRC regulations 10 CFR Part 19, "Notices, Instructions and Reports to Workers: Inspection and Investigations," 10 CFR Part 20, "Standards for Protection Against Radiation," and other applicable regulations.
2. Notify NRC in writing of any change in mailing address.
3. In accordance with 10 CFR 30.36(d), notify NRC, promptly, in writing within 60 days, and request termination of the license:
 - a. When you decide to terminate all activities involving materials authorized under the license whether at the entire site or any separate building or outdoor area;
 - b. If you decide not to acquire or possess and use authorized material; or
 - c. When no principal activities under the license have been conducted for a period of 24 months.
4. Request and obtain a license amendment before you:
 - a. Change Radiation Safety Officers;
 - b. Order byproduct material in excess of the amount, radionuclide or form authorized on the license;
 - c. Add or change the areas or address(es) of use identified in the license application or on the license; or
 - d. Change the name or ownership of your organization.

5. Submit a complete renewal application or termination request at least 30 days before the expiration date on your license. You will receive a reminder notice approximately 90 days before the expiration date. Possession of radioactive material after your license expires is a violation of NRC regulations.

In addition, please note that NRC Form 313 requires the applicant, by signature, to verify that the applicant understands that all statements contained in the application are true and correct to the best of the applicant's knowledge. The signatory for the application should be the licensee or certifying official rather than a consultant. Since the NRC also accepts a letter requesting amendment or renewal of an NRC license, the signatory for such a request should also be the licensee or certifying official rather than a consultant.

NRC will periodically inspect your radiation safety program. Failure to conduct your program according to NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC may result in enforcement action against you. This could include issuance of a notice of violation; imposition of a civil penalty; or an order suspending, modifying, or revoking your license as specified in the NRC Enforcement Policy. The NRC Enforcement Policy is available on the following internet address:

<http://www.nrc.gov/about-nrc/regulatory/enforcement/enforce-pol.html>.

An electronic version of the NRC's regulations is available on the NRC Web site at www.nrc.gov. Additional information regarding use of radioactive materials may be obtained on the NRC Web site at <http://www.nrc.gov/materials/miau/mat-toolkits.html>. This site also provides the link to the toolbox for updated information on the revised regulations for naturally-occurring and accelerator-produced radioactive materials (NARM).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Thank you for your cooperation.

Sincerely,

/RA/

Latischa M. Hanson, M.Sc., Health Physicist
Nuclear Materials Safety Branch B
