Subject: [External_Sender] Docket ID NRC-2009-0279

I support the proposal to establish the dose limit as 1 mSv from the declaration of pregnancy: If the fetus is more sensitive to radiation, then we need a more sensitive limit.

Moreover, I think it is important to protect the fetus even if declaration of pregnancy is not made in writing, when it is obvious that the fetus is there in need of protection.

Matching ICRP standards would also reduce confusion for visiting or resident international scholars.
