General Comment

Many people are college educated. We fully understand the bio accumulating harm that has been caused by the Fukushima melt down disaster. This is a wake up call. It is time to carefully shut down the operating nuclear power plants and send the radioactive refuse to a deep hole in Nevada. Nuclear power plants only boil water in a very dangerous ways. We no longer need them going forward in our human society. There will be financial losses to shareholders. It will be better to shut them down safely than to watch as they have melt down accidents in our country. It is past time to close them down and end this chapter in our history.
