NRC 7. Part C.9a - Ultimate end use(s)

Cambridge Isotope Laboratories Inc., plan to sell the various deuterium compounds to the ultimate consignees (listed in Part C. 9) for further distribution in to the Qatar medical, pharmaceutical, chemical and industrial markets. Their customers in Qatar typically use these materials in relatively small quantities, (less than 1 kg) for scientific research. This type of research may include identification of chemicals in reaction pathways, metabolic studies, or environmental analysis. No material will be used in any activity related to isotope separation, heavy water production, or in the fabrication of nuclear fuel.

AFFIDAVIT PURSUANT TO 10CFR 2.390

I, Maureen Duffy, Vice President of Sales and Marketing of Cambridge Isotope Laboratories (CIL) hereby affirm and state

1. I have been specifically delegated the function of reviewing the proprietary information sought to be withheld from CIL's specific license application for export to Qatar and am authorized to apply for its withholding on behalf of CIL.
2. CIL is providing NRC with the list of our customers in Qatar as part of the application process for the specific license to export. The list is proprietary commercial information.
3. The information sought to be withheld pursuant to the provisions of paragraph (a) (4) of 10 CFR 2.390 is the list of customers which are marked as follows in the license application submissions "Proprietary information submitted under 10 CFR 2.390 to be withheld from public disclosure under 10 CFR 2.390".
4. The list of customers should be held in confidence by the NRC based on paragraph (b) (4) of 10 CFR 2.390 because:
 - i) This information is and has been held in confidence by CIL.
 - ii) This information is of a type that is customarily held in confidence by CIL and there is a rational basis for doing so because this information if released might result in the loss of an existing competitive advantage as follows:
 - a. The information reveals the list of who CIL does business within Qatar.
 - b. The information, if used by a competitor, is likely to result in an advantage to the competitor revealing who is likely to be interested in their competing products.
 - iii) This information is being transmitted to the NRC voluntarily and in confidence.
 - iv) This information that specific customers are doing business with CIL is not in public sources.
 - v) Public disclosure of this information is likely to cause substantial harm to the competitive position of CIL because of the reasons outlined below:
 - a. Similar products are manufactured and sold by competitors to CIL

Cambridge Isotope Laboratories, Inc.

50 Frontage Road, Andover, MA 01810-5413 USA
PH: 800.322.1174 (N. AMERICA) PH: 978.749.8000
FAX: 978.749.2768 WEB: www.isotope.com

- b. The disclosure of CIL customers to competitors could result in competitors pursuing business CIL currently has. It is my belief that a competitor would have to undertake considerable effort and expense to generate the contacts and business held by CIL.
 - c. In order to generate such information, a competitor would also require considerable time.
 - d. If a competitor used this information and did not have to undertake the work required to generate these sales leads they are likely to have easier access to provide competitive offers to take business from CIL.
5. Accordingly, CIL requests that the designated information be withheld from public disclosure pursuant to paragraph (a)(4) of CFR 10.2390.
