Linear No-Threshold Model and Standards for Protection Against Radiation

Comment On: NRC-2015-0057-0010

Linear No-Threshold Model and Standards for Protection Against Radiation; Notice of Docketing and Request for Comment

Document: NRC-2015-0057-DRAFT-0012

Comment on FR Doc # 2015-15441

Submitter Information

Name: Leonard Manzanares

General Comment

I fully support the position of moving toward the hormesis model over the current LNT model and the removal of ALARA from the regulations. The increase of occupational worker dose limits and the limits to the public would also need to happen in order for this system to function. There is more information supporting the hormesis model over LNT and it is clear that the time to change is now. The public and private entities can no longer afford this and it is hurting the industry making us be more reliant on fossil fuels for example in the power industry and making defense production and sustainability outrageous for the American tax payer.
