SUBJECT: U.S. NUCLEAR REGULATORY COMMISSION PRELIMINARY
DETERMINATION OF NO EFFECTS REGARDING THE TROJAN
INDEPENDENT SPENT FUEL STORAGE INSTALLATION DECOMMISSIONING
FUNDING PLAN

Dear Ms. Zablan:

By letter dated December 13, 2012, Portland General Electric Company (PGE) submitted a decommissioning funding plan (DFP) for the Trojan Independent Spent Fuel Storage Installation (ISFSI) for U.S. Nuclear Regulatory Commission's (NRC) review and approval. The ISFSI is part of the Trojan nuclear power plant facility, located in Columbia County, Oregon. Pursuant to 50 CFR 402.13, the NRC seeks to initiate informal consultation with the U.S. Fish and Wildlife Service to determine whether the NRC's review and approval of the DFP requires formal consultation under Section 7 of the Endangered Species Act of 1973, as amended.

The NRC regulations at Title 10 of the *Code of Federal Regulations* (10 CFR) Part 72, "Licensing Requirements for the Independent Storage of Spent Nuclear Fuel, High-Level Radioactive Waste, and Reactor-Related Greater than Class C Waste," govern the storage of spent nuclear fuel (spent fuel) generated at commercial nuclear power reactors licensed by the NRC. Spent fuel that has been removed from the reactor's spent fuel pool is typically stored at a nuclear power plant's ISFSI.

The NRC requires its licensees to plan for the eventual decommissioning of their licensed facilities prior to license termination. On June 17, 2011, the NRC published a final rule amending its decommissioning planning regulations (76 *Federal Register* (FR) 35512). The final rule amended the NRC regulation, 10 CFR 72.30, which concerns financial assurance and decommissioning for ISFSIs. This regulation now requires each holder of, or applicant for, a license under 10 CFR Part 72 to submit, for NRC review and approval, a DFP. The purpose of the DFP is to demonstrate the licensee's financial assurance, *i.e.*, that funds will be available to decommission the ISFSI. The NRC staff is reviewing the information submitted by PGE. Specifically, the NRC must determine whether PGE's DFP contains the information required by 10 CFR 72.30(b) and whether PGE has provided reasonable assurance that funds will be available to decommission the ISFSI.

The Trojan ISFSI DFP is publicly available in the NRC's Agencywide Documents Access and Management System (ADAMS) accessible at <http://www.nrc.gov/reading-rm/adams.html>. The ADAMS accession number for the application package is ML12355A286.

The NRC approval of PGE's DFP will not authorize or result in changes to licensed operations or maintenance activities, or changes in the types, characteristics, or quantities of radiological or non-radiological effluents released into the environment from the ISFSI, or result in the creation of any solid waste. Moreover, the approval of the DFP will not authorize any construction activity, facility modification, or any other land-disturbing activity. Additionally, the scope of this proposed action does not include, and will not result in, the review and approval of any decontamination or decommissioning activity or license termination for the ISFSI or any other part of the Trojan site. Any future NRC approval of site-disturbing remediation activities conducted by PGE would require an NRC environmental review, including an Endangered Species Act review.

In accordance with 10 CFR Part 51, the NRC regulations that implement the National Environmental Policy Act of 1969, as amended, the NRC is preparing an environmental assessment (EA) for the proposed action. Given the reasons set forth above, the NRC has determined that the approval of the DFP is a procedural and administrative action that will not result in any significant impact to the environment. Therefore, the NRC has determined that the proposed action is not likely to adversely affect listed species or critical habitat and that formal consultation under Section 7 is not required. The NRC respectfully requests the Service's concurrence with this determination. Please provide your concurrence, or any comments or information that you may have regarding the NRC's Section 7 determination for this matter to the U.S. Nuclear Regulatory Commission, ATTN: Michele Sampson, Mail Stop T-4B34, US Nuclear Regulatory Commission, Washington, DC 20555. If you have any questions, please contact Mr. Jose Cuadrado of my staff by telephone at 301-415-0606 or by e-mail at jose.cuadrado@nrc.gov. Thank you for your assistance.

Sincerely,

/RA/ J. Vera for

Docket No.: 72-017
License No.: SNM-2509
TAC No.: L24818

The NRC approval of PGE's DFP will not authorize or result in changes to licensed operations or maintenance activities, or changes in the types, characteristics, or quantities of radiological or non-radiological effluents released into the environment from the ISFSI, or result in the creation of any solid waste. Moreover, the approval of the DFP will not authorize any construction activity, facility modification, or any other land-disturbing activity. Additionally, the scope of this proposed action does not include, and will not result in, the review and approval of any decontamination or decommissioning activity or license termination for the ISFSI or any other part of the Trojan site. Any future NRC approval of site-disturbing remediation activities conducted by PGE would require an NRC environmental review, including an Endangered Species Act review.

In accordance with 10 CFR Part 51, the NRC regulations that implement the National Environmental Policy Act of 1969, as amended, the NRC is preparing an environmental assessment (EA) for the proposed action. Given the reasons set forth above, the NRC has determined that the approval of the DFP is a procedural and administrative action that will not result in any significant impact to the environment. Therefore, the NRC has determined that the proposed action is not likely to adversely affect listed species or critical habitat and that formal consultation under Section 7 is not required. The NRC respectfully requests the Service's concurrence with this determination. Please provide your concurrence, or any comments or information that you may have regarding the NRC's Section 7 determination for this matter to the U.S. Nuclear Regulatory Commission, ATTN: Michele Sampson, Mail Stop T-4B34, US Nuclear Regulatory Commission, Washington, DC 20555. If you have any questions, please contact Mr. Jose Cuadrado of my staff by telephone at 301-415-0606 or by e-mail at jose.cuadrado@nrc.gov. Thank you for your assistance.
