Dear Secretary,

Dear NRC Commissioners and Staff:

NRC's Radiation Standards, 10 CFR 20, allow too much radioactivity to be released. The cancer risks from the current standards are too high, especially for women, children and babies. Pay attention to the danger to our gene pool and reproductive phase of our lifecycle.

- 1)Reduce the legal radioactivity permitted to be released into air and water; never increase them again.
- 2)Stop the additional radioactive releases to sewage.
- 3)Protect the most vulnerable-during the reproductive phase of our life cycle by allowing less or no radiation at this phase.
- 4)Acknowledge radiation causes health problems other than cancer: including heart disease, reduced immunity, mental retardation and more.
- 5)If you don't make the radiation rules stronger for us, our kids, our DNA and for nuclear workers, don't change them at all.
- 6)Don't refer to copyrighted documents. Release or rewrite the explanation for all changes so you can make them public.

Linda Kade
