Att: Vered Shaffer, Health Physicist

RE: NRC License 21-32601-01, Mid-Michigan Diagnostic
Clarification on the usage/storage of radioactive material at the new location of
2300 Austins Parkway, Suite C, Flint, MI. 48507.

All radioactive material packages will be received and stored in the locked van at this new site. Includes: a) receiving radioactive doses from the pharmacy and returns of radioactive doses to the pharmacy and b) storing of licensed material (^{57}Co flood source) in the locked van.

For quality control testing on the nuclear camera in the storage equipment room at this location: The flood source and radioactive doses from the pharmacy (stored in the locked van) will be brought into the building for Q-C purposes only. The nuclear tech. will remove the doses from the locked van and return them to the locked van. (there is no hot lab in the building)

This new site is considered to be a temporary job site (used for Q-C testing only)
There is no storage of radioactive materials in the building. Surveys are done at the end of Q-C testing, to show no residual contamination.
No diagnostic patient testing will be done at this new location.

Sincerely,

Anthony Bennett, M.D.
Radiation Safety Officer
Mid-Michigan Diagnostic

Shaffer, Vered <Vered.Shaffer@nrc.gov>
To: "youngdar00@gmail.com" <youngdar00@gmail.com>

Hi Darlene,

Thank you for speaking with me today regarding your amendment request for NRC License 21-32601-01, Mid-Michigan Diagnostic. Please provide the clarification on the usage/storage of radioactive material at your new location in Flint, MI in a signed and dated letter. The letter can either be faxed to me at the number below or you can send me a pdf copy. If you have any questions, please don't hesitate to contact me.

Thank you!

Vered
