SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NO. 11-27779-01

By electronic communication dated May 20, 2015, you informed the Nuclear Regulatory Commission (NRC) that Performance Testing, LLC, wished to terminate NRC radioactive materials license 11-27779-01. The NRC Form 314 dated May 13, 2015 stated that all radioactive material had been transferred to a licensed entity. The supporting documentation for this request provided a copy of the most current leak test result demonstrating that there was no evidence of leakage of radioactive material from the sealed sources.

The NRC staff has reviewed the supporting documentation to your NRC Form 314 and historical docket file. The staff concluded that all licensable radioactive material has been removed from your facility located at 315 Adams Lane, Lewiston, Idaho. This facility is suitable for unrestricted use in accordance with 10 CFR 20.1402, "Radiological Criteria for Unrestricted Use." Based on these conclusions, no further remediation or actions with respect to NRC regulated material is required.

Please find enclosed Amendment No. 03 to License No. 11-27779-01 authorizing your license termination. An environmental assessment for this action is not required since this action is categorically excluded under 10 CFR 51.22(c)(20)(ii).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You can contact me at 817-200-1189 if you have questions or require clarification on any of the information stated above.

Sincerely,

/RA/
