2443 WARRENVILLE RD. SUITE 210  
LISLE, IL 60532-4352

**JUN 22 2015**

Patricia Swiss  
Radiation Safety Officer  
Benchmark Engineering, Inc.  
607 East Lake St.  
Harbor Springs, MI 49740

Dear Ms. Swiss:

Enclosed is Amendment No. 10 renewing your NRC Material License No. 21-20496-01 in accordance with your request. Note that we have removed Conditions 15 and 20 as listed on the previous amendment to your license, as they are redundant or not applicable for the types of gauges authorized under the license. Please also note that we have updated the Amendment No. to reflect the actual revision to your license. We have noted that the February 5, 2009, amendment to your license incorrectly listed Amendment No. 7, where it actually reflected Amendment No. 9 to your license. No corrected copy has been issued because that amendment has been superseded by the current Amendment No. 10.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

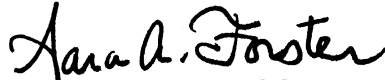

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

P. Swiss

- 2 -

In accordance with Title 10 of the *Code of Federal Regulations* Section 2.390, a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

A handwritten signature in black ink, reading "Sara A. Forster". The signature is fluid and cursive, with the first letters of each word being capitalized and prominent.
