LISLE, ILLINOIS 60532-4352

JUN 29 2015

Victor D. Hosfeld, M.S.
Radiation Safety Officer
MidMichigan Medical Center
4000 Wellness Drive
Midland, MI 48670

Dear Mr. Hosfeld:

Enclosed is Amendment No. 80 to your NRC Material License No. 21-01549-02 in accordance with your request.

Please note that significant changes to your license may appear in **bold** font, such as format changes resulting from requests you made and updates that we have implemented at this time.

This amendment renews your license for a ten year term. Your license will not expire until June 30, 2025.

At this time, because you are not using Positron Emission Tomography (PET) materials permitted by 10 CFR 35.200 under this license, we have excluded authorization for PET materials from Subitem No. 6.B.

The changes made to your license in Amendment No. 79, which was acted upon while this renewal was pending, have been carried over into this amendment also.

Your letters dated December 30, 2014, and June 25, 2015, requested a change in the name on your license to reflect your affiliation with the University of Michigan (U of M), which apparently took place in June 2013.

It appears that this affiliation constituted a change in ownership and/or control. You will have to apply for and obtain NRC's written consent at this time.

In our telephone discussion on June 11, 2015, in which we discussed the request for additional information letter I faxed to you dated June 11, 2015, it was mutually agreed that you would respond to this matter separately.

We will consider the name change you requested for this license, resulting from the change in ownership/control, when we review your request for the change of ownership/control that you should submit now.

Please review the enclosed document carefully and be sure that you understand all conditions.

The enclosed document contains sensitive security-related information.
When separated from this cover letter this letter is uncontrolled.

V. Hosfeld

If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

If you have any questions concerning this amendment please contact me at either (630) 829-9841 or (800) 522-3025, ext. 9841. My fax number is 630-515-1078. My email address is colleen.casey@nrc.gov.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system.

Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability.

The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

A copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS).

The NRC's document system is accessible from the NRC Web site at: <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

You will be periodically inspected by NRC.

Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you.

This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011.

While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture.

You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at:

<http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>.

We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

Sincerely,

A handwritten signature in cursive script that reads "Colleen Carol Casey".
