 4. Public Meeting with the NRC, "Diablo Canyon Power Plant Generator Circuit Breaker Project," December 11, 2014
 5. NRC Letter, "DIABLO CANYON POWER PLANT – NRC INTEGRATED INSPECTION REPORT 050000275/2009003 and 050000323/2009003," dated August 5, 2009

Dear Commissioners and Staff:

In Reference 1, Pacific Gas and Electric Company (PG&E) withdrew License Amendment Request (LAR) 09-07, and provided a regulatory commitment to submit a new LAR in order to address a NRC violation (Reference 5). In Reference 2, 3, and 4, PG&E provided updates on the project status, identified its intent to pursue a change to install generator circuit breakers, and provided revisions to the LAR submittal commitment date.

Subsequently, PG&E determined that changes necessary to fully address the violation by establishing compliance with General Design Criteria (GDC)-17 for the 500 kV offsite power system could be implemented independently from the generator circuit breaker LAR. The issues raised by the violation have accordingly been resolved, and the LAR is not required to establish compliance. Therefore, PG&E is withdrawing the voluntary regulatory commitment (as defined in NEI 99-04) discussed in References 1 through 4.

PG&E intends to continue the process of preparing a design change to install generator circuit breakers as an enhancement to the facility, and will do so via routine coordination with the NRC Project Manager for Diablo Canyon Power Plant.

If you have any questions, or require additional information, please contact Mr. Hossein Hamzehee at (805) 545-4720.

Sincerely,

Barry S. Allen
Vice President, Nuclear Services
