NRC-2015-0057

The Nuclear Regulatory Commission has received a petition for rulemaking requesting that the NRC amend its “Standards for Protection Against Radiation” regulations and change the basis of those regulations from the Linear No-Threshold (LNT) model of radiation protection to the radiation hormesis model (<https://www.federalregister.gov/articles/2015/06/23/2015-15441/linear-no-threshold-model-and-standards-for-protection-against-radiation>). The comment period is listed as ending on September 8, 2015. I respectfully request a 3 month extension of this deadline, noting that this time frame is rather short, and coincides with many US professionals’ summer vacation schedules.

Mike
