General Comment

Docket Numbers. PRM-20-28, PRM-20-29, and PRM-20-30 are true and accurate. I have worked in Nuclear Power since 1969. I first was a reactor operator , USN 1967-1973, submarines. Then BSNE 1973-1977 U of Wisc. Madison.

Start-up Engineer BWRs 1978-79 at Fukushima then Fermi and other NPPs, still work at NPPs. I received 1 Rem in 1/2 hour in USN. no problem. 800-1,000 people in Japan were killed due to evacuation for no reason. I would never evacuate because of a NPP problem. The 2 Rem annual dose limit in Japan is ridiculous. They could be home now or have never left accept for the ignorant fear of radiation. In Ramsar, Iran they receive " Inhabitants who live in some houses in this area receive annual doses as high as 132 mSv from external terrestrial sources". Since a Sv = 100 Rem, that's 13.2 Rem per year. The LNT model is killing people and NOT because it is too low. ALARA is not helping anyone, in fact it hurts everyone.

Please listen to the uninformed Helen Caldicott, she is a crazy anti-nuke MD that lies constantly and can't prove anything she says. Is she the one that you agree with?

If you listen to the medical community that works with radiation constantly, you will understand. Ted Rockwell and Bernard Cohen know/knew more about radiation health effects than anyone I have ever read.

Thanks, Keith BSNE '77 PE Mi, CA
