SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NO. 05-27559-01

By letter dated May 5, 2015, you informed the U.S. Nuclear Regulatory Commission (NRC) that TechniScan, Inc., wished to terminate NRC radioactive materials license number 05-27559-01. The NRC Form 314 dated April 30, 2015, stated that all radioactive materials had been transferred to your State of Colorado radioactive materials license.

The staff has reviewed the statements made in NRC Form 314 and the results of the 2012 NRC inspection. NRC license number 05-27559-01 authorizes work at temporary job sites in NRC jurisdiction and no field stations are identified in this license. Based on the documentation submitted and a review of your historical file, the staff concluded that all licensable radioactive material is no longer stored at temporary job sites in NRC jurisdiction and no field stations need to be released for unrestricted use.

Please find enclosed Amendment No. 04 to License No. 05-27559-01 authorizing your license termination. An environmental assessment for this action is not required since this action is categorically excluded under 10 CFR 51.22(c)(20)(ii).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You can contact me at 817-200-1273 if you have questions or require clarification on any of the information stated above.

Sincerely,
