Subject: Amendment Request - Mail Control no. 586975
Date: Friday, June 19, 2015 9:10:00 AM

Special Testing Laboratories, Inc.
License No. 06-30361-01
Docket No. 03034318
Control No. 586975

Mr. Gallo

In order to continue the review of your amendment request for your NRC license, we need additional information. If you have any questions, please contact me (610-337-5089).

In response to your request to increase your license possession such that you will be able to possess approximately 25 portable nuclear gauges, please provide a facility diagram for each permanent portable gauge storage location. The diagram should include the following:

- The use of adjacent areas to the storage area(s)(including above and below) and information relevant to public dose. Please provide the public dose calculated for the maximally exposed individual.
- Describe the security methods used on each storage location to comply with 10 CFR 30.34(i).
- Please indicate the capacity, i.e. the number of portable gauges that can be stored, for each location.

Please respond in writing with a signed letter. You may submit the signed response document by hard copy, or as a pdf copy attached to an email, or by facsimile to 610-337-5269. Please be sure to include the Control No. 586975 on your response. We would appreciate a response within 20 days in order to expedite review of the license renewal application.

Thank you for your cooperation.

John J. Miller
Health Physicist
Division of Nuclear Materials Safety
