2) NRC Regulatory Issue Summary (RIS) 2015-07, "Process for Scheduling and Allocating Resources in FY 2017 for the Review of New Licensing Applications for Large Light-Water Reactors and Small Modular Reactors," dated May 11, 2015

Subject: DTE Electric Company Voluntary Response to RIS 2015-07

In RIS 2015-07 (Reference 2), the NRC requested that holders of combined licenses issued under 10 CFR Part 52 provide certain information to assist the NRC in determining its resource and budget needs for fiscal year 2017. Specifically, the NRC requested the number of licensing actions (e.g., license amendment requests, exemption requests, relief requests) combined license holders anticipate submitting to the NRC in fiscal year 2017.

The purpose of this letter is to inform the NRC that DTE Electric does not have plans to submit any licensing actions for fiscal year 2017.
