CAPE DOWNWINDERS & PILGRIM WATCH'S 2.206 PETITION TO MODIFY, SUSPEND, OR TAKE ANY OTHER ACTION TO THE OPERATING LICENSE OF PILGRIM STATION UNTIL THE NRC CAN ASSURE SUFFICIENT LAND-BASED SECURITY AT PILGRIM STATION IS IN PLACE TO PROVIDE REASONABLE ASSURANCE TO SATISFY ITS OBLIGATION TO PROTECT PUBLIC HEALTH & SAFETY –SUPPLEMENT 1

Petitioners supplement its September 16, 2014 petition asking that the Nuclear Regulatory Commission (NRC) institute a proceeding to modify, suspend or take any other action¹ as may be proper to the operating license of Pilgrim Station in order that the NRC can assure Pilgrim's onsite land-based security is upgraded so that checkpoints are manned at all times, and that surveillance of areas in the owner-controlled area insures that intruders will be detected and prevented entering. Petitioners show that owner-controlled area protections are eroded at Pilgrim Station and insufficient to thwart a potential attack.

During the June 9, 2015 PRB teleconference petitioners indicated that Entergy's addition of "No Trespassing signs" along its property, whether on water in the form of buoys or on land, would not be an effective deterrent. Often a picture speaks louder than words and humor is always appreciated.

¹ NRC Enforcement actions include: notices of violation, civil penalties, orders, notice of nonconformance, confirmatory action letters, letters of reprimand, and demand for action.

Respectfully submitted on June 9, 2015,
