Steve:

How do we resolve this. Can we get the hard copy at the reading room?

Manny

I am having trouble reading the materials that FPL has posted to the reading room. Specifically: the Eberli folder has 3 files. I can read the text report but I cannot keep the figure files open. They open and then the site crashes. I believe this is because the files are very large. Can FPL make a good copy of those figures available in the physical reading room so that I can really examine them.

I have no trouble viewing the Santaren Anticline sensitivity calculation file
