Hello,

I am upset you have not allowed public comment on the renewal application by Cameco for its Crow Butte in Situ leach uranium mine, Crawford NE.

When droughts are depleting water resources, that you would allow a company for profit to damage and pollute pure water resources is outrageous.

Are you protecting the public, or profit interests???

Our founding fathers would revolt over an agency denying public input—another Boston Tea Party would erupt.

Please do NOT renew Cameco's application unless strong, clear safeguards are approved by the PUBLIC who has to drink this water.

What are you thinking?

Thank you for your time.

Best,
Geoff
