A.6 STATEMENT OF WORK

1. PROJECT TITLE

Technical Editing Assistance for Indian Point Supplemental Environmental Impact Statement (SEIS) Supplement.

2. BACKGROUND

Based on the Atomic Energy Act, the U.S. Nuclear Regulatory Commission (NRC) issues licenses for commercial nuclear power reactors to operate for up to 40 years and allows these licenses to be renewed for another 20 years. The license renewal environmental and safety requirements are published as Title 10 of the *Federal Code of Regulations* Part 51

(10 CFR Part 51) and 10 CFR Part 54, respectively. The NRC has published regulatory guidance for the NRC staff (the staff) to follow when reviewing license renewal applications to address radiological and non-radiological environmental issues titled the "Standard Review Plans for Environmental Reviews for Nuclear Power Plants, Supplement 1: Operating License Renewal," NUREG-1555, Supplement 1, Rev. 1 issued June 2013 to ensure conformance with its review process and to share the process with stakeholders. The NRC has also published regulatory guidance for the staff to follow when reviewing applications to address safety issues titled NUREG-1800, "Standard Review Plan for Review of License Renewal Applications for Nuclear Power Plants," Revision 2 issued December 2010 (SRP-LR) to ensure the quality and uniformity of staff reviews and to share the process with stakeholders.

The staff has accepted a License Renewal Application (LRA) from the Indian Point nuclear power plant. The staff documents its support for the final related regulatory decisions in two NUREG-series publications: Supplemental Environmental Impact Statements (SEISs) and Safety Evaluation Reports (SERs).

The SEIS documents the staff's review of the ER and plant-specific environmental analysis, which considers and weighs the environmental impacts of the proposed action, the environmental impacts of alternatives to the proposed action, and mitigation measures available for reducing or avoiding adverse impacts. NRC publishes the Final SEIS (FSEIS) as a supplement to NUREG-1437, "Generic Environmental Impact Statement for License Renewal of Nuclear Plants," Volumes 1 and 2, which, for certain environmental impacts, establishes findings applicable to all nuclear power plants.

The staff issues supplements to the SEIS when new issues are identified by the applicant or when the staff issues new guidance regarding technical issues that could potentially change the staff's conclusions in the SEIS. SEIS supplements can vary in length considerably depending on the number of changes to the SEIS required. The Indian Point SEIS Supplement is expected to be approximately 150 pages in length and be similar in content and formatting to the FSEIS.

3. SCOPE

The objective of this contract is to obtain expert document layout, assembly, formatting, and technical editing services to assist the NRC's Office of Nuclear Reactor Regulation, Division of License Renewal to prepare the SEIS Supplement for the Indian Point LRA.

4. APPLICABLE DOCUMENTS AND STANDARDS

The contractor shall provide accessible, archival-quality, print-ready, Web-enabled PDF and DOC source files that meet Federal and agency requirements for publications. Task: Supplemental Environmental Impact Statement (SEIS) Supplement

The contractor shall revise the SEIS supplement based on additional information as provided by the COR. The contractor shall provide the necessary technical editor review of the SEIS supplement to ensure the document is complete and meets the NRC publication requirements. Recommended technical editorial changes to the specific technical evaluation input and additional information shall be provided to the COR in a track changes format for review before incorporation into the SEIS supplement. The contractor shall revise the SEIS supplement based on comments and revisions provided by the COR and submit a final SEIS supplement that is camera-ready for NUREG publications.

The deliverable is a cover-to-cover plant-specific SEIS supplement based on technical and administrative information in the LRA and supplemental information, as provided by the COR. The contractor shall also provide the necessary review of the SEIS supplement to ensure that it meets the NRC publication requirements for a NUREG-series report. The staff will review the SEIS supplement and provide comments to the contractor. The contractor shall revise and provide the SEIS supplement based on comments from the COR in accordance with the delivery schedule in section 6, "Deliverables and Delivery Schedule."

6. DELIVERABLES AND DELIVERY SCHEDULE

The contractor shall provide the deliverables listed below in two electronic formats (Microsoft® Office Word 2010 or NRC designated word processing software and PDF file using Adobe Acrobat Professional X or NRC designated PDF) and a hard copy printed from the PDF file to the COR. The final deliverables for each task shall not have any restrictions in their use by the government. If document protections are employed during the editing process as part of a version control methodology, an additional unprotected version of the final deliverable for government records and future use must be provided.

The NRC has an expectation that the contractor will be able to perform technical editing of a minimum of 70 pages per day as well as format a minimum of 70 pages per day. If, due to multiple tasks under this contract being performed simultaneously, the below delivery schedules are unachievable, the contractor shall coordinate with the COR to prioritize work and agree on an acceptable delivery schedule.

Because of the strict project schedule and multiple NRC contributors to the documents, it is expected the COR will provide comments and revisions to the contractor in numerous batches, requiring turnaround within one work day in certain cases as directed by the COR.

The following are standard deliverable due dates for the task:

For example, the style sheet will note the name of the style, formatting details, and the specific functions of and use for each style. The contractor shall include corrections to meet quality standards as a part of this deliverable.

The final deliverable document for Task 10 shall:

- Be provided in the NRC-approved version of Microsoft ® Office Word 2010 or NRC designated word processing software, as directed by the COR
