To Whom It May Concern:

With all of the environmental impact of fresh water draws and overheated cooling canals, not to mention potential hurricane impact on the facility, it seems unconscionable that FPL would be allowed to add additional reactors to its Turkey Point facility. The existing is already pushing the limits of sustainability.

No additional water draws should be allowed. Canal temperatures and salinity should be lowered. This environmental situation is incompatible with current operations much less expanded ones.

Sincerely,
Colgate Darden
