Subject: [External_Sender] expansion and renewal of Turkey Point

As a member of the local community (living in unincorporated Miami-Dade County only a few miles from Turkey Point), I urge the commission NOT to approve the FPL application.

Although I am not opposed to nuclear power generally (so long as waste can be properly dealt with), I believe this application is misguided. Clearly, the experience of Fukushima in Japan should be causing all regulators to seriously question the wisdom of siting ANY additional nuclear facilities adjacent to low-lying shorelines, nature preserves, and significant population centers. In addition, the demands on the limited fresh water reserves of south Florida would be highly significant.

Florida - the Sunshine State - offers no incentives whatsoever for conservation or solar power - largely due to the influence of FP&L and its desire to expand its nuclear facilities and have them forced into the rate base without a proper discussion of alternatives.

Respectfully, adding new nuclear facilities in such a place at such a time is not the right way to go. Please force a consideration of alternatives.

Sincerely,

Keith Trauner
