RAI #: SW-03

Category: Water Resources

Statement of Question:

Section 4.6.3.1 of the ER references the 1978 Final Environmental Statement, where it is stated that the intake velocity at the face of the travelling screens in the river screen house is 0.2 m/second (0.5 ft/second) during one pump operation and 0.3 m/second (0.9 ft/second) during “occasional” operation. Provide a narrative summary describing any field studies or modeling studies that have occurred during operations that describe the flow through velocity at the traveling screens at the river screen house and at the lake screen house.

Response:

Studies have not been performed during operations to further describe the flow velocities through the traveling screens at the river and cooling pond intakes.

List of Attachments:

None.
