**RE: RESPONSE TO CONTROL 588176
 REQUEST FOR CHANGE OF OWNERSHIP / CHANGE OF CONTROL
 MATERIAL LICENSE # 21-32606-01, DOCKET # 030-37084**

Dear Bill:

In response to CONTROL 588176 via your fax on July 13th, 2015, below is our responses to your request for information regarding our request for ownership change/change of control of the NRC License.

1. Currently the license is held by Snyder & Staley Engineering, PLC, which is equally owned by myself, Michael D. Staley, and John K. Snyder. SMAC Testing, Inc. is equally owned by myself, Michael D. Staley, and Stuart J. MacDonald. In essence, the construction testing portion of Snyder & Staley Engineering, PLC is being sold to SMAC Testing, Inc., with Stuart MacDonald and Michael Staley purchasing this portion of the business from John Snyder and Michael Staley. Stuart MacDonald and Michael Staley will be 50% owners of SMAC Testing, Inc. The purchase includes all construction testing equipment, including the three nuclear density gauges, and all current business backlog.
2. With regard to changes in personnel or duties related to the licensed program, Stuart MacDonald has been managing the construction testing department of Snyder & Staley Engineering since 2006 and since this time has been the person responsible to maintain the license program and is currently the Radiation Safety Officer for this license. Once the license is transferred to SMAC Testing, Inc., Stuart MacDonald will continue to maintain the license program documentation and will remain the Radiation Safety Officer.
3. The location of the three nuclear density gauges covered by our license will move from 3160 Christy Way S, Suite F, Saginaw, Michigan 48603 to 824 Tittabawasee Rd, Saginaw, Michigan 48604 (SMAC Testing, Inc. office). SMAC Testing, Inc. telephone number is 989-249-1105 and fax number is 989-249-1171. The locking storage cabinet for the gauges will be moved to the new location to store the gauges.
4. Stuart MacDonald has recently reviewed status of the surveillance program for the license and at the present time, all personnel that use the nuclear density gauges have completed the required training, a wipe test was recently completed on all three gauges, information packages for the gauges that accompany the technicians to project sites have been reviewed and updated as necessary and all record books have been reviewed and updated. All personnel using the nuclear density gauges have current radiation badges available for their use when operating the gauges and badges are supplied, tested and record created by supplier, Troxler Laboratories.

RECEIVED JUL 15 2015

Mr. Bill Reichhold

July 14, 2015

5. All records related to these nuclear density gauges, including the safe and effective decommissioning of the facility, will be transferred from Snyder & Staley Engineering, PLC to SMAC Testing, Inc.
6. SMAC Testing, Inc. will continue to abide by all constraints, conditions, requirements and commitments of the current license held by Snyder & Staley Engineering upon its transfer. Considering that Stuart MacDonald currently maintains the license program documentation and is the current Radiation Safety Officer, we strongly believe this transition of license holder will be seamless, complete and in full compliance of the NCR license requirements.
7. With our signatures below, John Snyder and Michael Staley agree to the change in ownership/control of the licensed material from Snyder & Staley Engineering, PLC to SMAC Testing, Inc., co-owned by Michael Staley and Stuart MacDonald

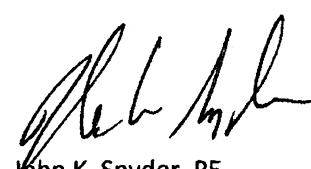

If you should have any questions or need additional information, please feel free to contact me at 989-797-1710.

Sincerely,

Snyder & Staley Engineering, PLC

Michael D. Staley, PE
Co-Owner

John K. Snyder, PE
Co-Owner
