**Attachments:** Scan001.pdf

Hector,  
Region III has additional information for the generally licensed devices listed in the GLTS. Attached is documentation for the disposal on five Model XK3 devices. The devices are as follows: 164, 921, 855, 922, and 858. We have also learned after talking to the vendor the Niton Model 309 have the serial numbers for these listed as the first five characters (U plus four numbers). The remaining numbers are the serial numbers for the source. The licensee must have changed sources several times and these are all listed as separate devices. The following are the devices which are listed several times and should be counted as only one device: U2970, U2163, and U3672.

I hope this helps to clarify the number of devices listed in the files for R Code 707659. If you have any questions, please contact me at 630-829-9875.

Thanks .

Ed

Hi Ed,

Attached are records of some units returned. We also received S/N 170 & 174. I don't see any records of these being shipped out so they were most likely disposed of.

My data base only goes to 2002, if any of the other units were returned we no longer have any records.
