Dear NRC,

I am opposed to FPL's proposal to build two more nuclear reactors at their Turkey Point site in South Florida. I request that the Nuclear Regulatory Commission and U.S. Army Corps of Engineers support the "No Action" alternative.

FPL has a once a year solar grant program for FPL customers. The grants are all taken in the first few minutes customers are allowed to sign into the site and fill out the application. I have been trying to get a solar grant for two year and I can never fill out the form in time to submit. It is my understanding that literally 10,000's of customers try for these grants. Wouldn't it be smarter to expand that program than to spend billions on a two more nuclear reactors.

Why not give solar a chance in the sunshine state?

Furthermore, very close to the proposed expansion site, there are Everglades and Biscayne national parks and an aquatic preserve, a national wildlife refuge, and a wetland habitat preserve. This area is also extremely vulnerable to the withdrawal of massive amounts of water from under Biscayne Bay as back-up cooling water. The back-up cooling water will increase salinity levels within the Bay and hasten saltwater intrusion into our limited freshwater supplies. The full impacts of which have not been thoroughly analyzed in the draft Environmental Impact Statement.

I support the "No Action" alternative given the project's potentially widespread negative environmental and public health and safety impacts.
