Subject: RE: GL-1119-19 Ametek Specialty Metals

Angie,

I spoke with Ametek licensee and the device identified under **NRC Device Key 828942** is actually the AM241 source within **NRC Device Key 2852**. In July 2013 the AM241 source S/N4871LQ was installed in Device 2852 by the manufacturer, Integrated Industrial Systems to replace a depleted source. Please remove the Device Key 828942 from Ametek general license. If you have any questions please let me know.

Thank you.

-Hector

Hector

They have reported the "Not In Possession" on the Round 19 registration form marking sect 4, but not marking section 2. Please see ML15163A062.

Angie,

How did Ametek informed us about not possessing the device? Did they call you or did they send a letter?

Good Afternoon

Hector

This recipient is claiming they were not in possession of NRC Key # 828942. Tenova 3rd Qrt 2013, reports sending this model #SS-3A with sn# 4871LQ to recipient location. Please verify the discrepancy..

Thanks

Angie
