General Comment

As a South Dade resident, I am alarmed at the prospect of having a nuclear plant near such a densely populated area in a hurricane zone. I think we need to take a lesson from the Fukushima disaster and opt for safer forms of energy. I realize that South Florida has an ever-increasing appetite for energy and that nuclear may seem like an immediate solution to the problem, but we need to take a broader view of the costs involved. The safety of my family and my community is not worth sacrificing at the alter of a quick fix. I urge you to deny this proposal and seek safer forms of energy.
