General Comment

I am writing to protest the application for the Turkey Point Nuclear Plant. I am a resident of Boca Raton and have frequently enjoyed the Everglades National Park and Biscayne Bay. The area is too fragile, beautiful and important to risk a an action that might jeopardize the natural environment. The habitat for wildlife cannot be replaced if there is an accident and I believe the risks are too great to warrant going forward with the Nuclear Power Plant. The hot water that will be released as a result of cooling, the nuclear waste that we have no way of safely dealing with, the electrical lines that will kill birds and mar the beauty of the landscape make it an unacceptable plan. Please deny the application for more nuclear plants in south Florida. I suggest that we build our use of solar energy which is safer, cleaner, and does not detract from the land. Thank you for your consideration.
