**Subject:** [External\_Sender] No to new reactors!

Dear NRC:

I am a former County Commissioner who represented South Miami-Dade (1994-2010) and a current resident of Pinecrest.

I object to the new reactors. FPL has done nothing but discourage solar power on individuals' rooftops, while saying they are working on solar throughout the state. Their small solar initiative pales in comparison to what could be done by individual homeowners and businesses. But they wouldn't make any money that way.

There are issues of sea level rise, salt water intrusion, the potential raiding of freshwater supplies needed for our growing population, nuclear waste, damage to the bay's coral reefs and estuaries and the prospect of dangerous and unsightly poles along US1 and in the Everglades.

We need to be concentrating on conservation and renewables – not more nuclear power.

Thank you for the opportunity to comment.

Sincerely,  
Katy Sorenson
