Dear Secretary,

NRC Commissioners and Staff:

NRC's Radiation Standards, 10 CFR 20, allow too much radioactivity to be released from the nuclear power fuel chain, its uranium mills, fuel factories, waste dumps and processors. Reduce allowable radioactive releases, doses and risks.

The cancer risks from the current standards are too high, especially for women, children and infants. Pay attention to the danger to our gene pool and the reproductive phase of our lifecycle.

1)Reduce the amount of radioactivity permitted to be released into air and water, and never increase them again. Reduce the legal dose to members of the public (from 100 or more millirems/year to one or a few, or, better yet: zero) from each nuclear power facility. NRC risk numbers show current levels could be causing 1 in 286 men, 1 in 190 women and 1 in 41 baby girls to die from cancer. Protect everyone to the level needed by the most vulnerable—don't "average" by gender or age.

2)Stop the additional radioactive releases to sewage. Delete Table 3 of Appendix B of the current rule. In addition to high risks from air and water emissions, NRC allows discharges into sewage that can amount to 500 MORE millirems per year!

3)Protect the most vulnerable by reducing the allowable exposure during the reproductive phase of our life cycle. Set standards to protect embryos, fetuses and infants, but reduce the legal exposure for pregnant workers and the embryo/fetus to less than the international recommendations (100 mr/remainder of pregnancy) and the public dose (100 mr/year). Less or no radiation at this part of our lifecycle will better protect all life-stages. Protect worker rights and privacy.

4)Acknowledge that radiation causes health problems other than cancer, and protect against those as well: including heart disease, reduced immunity, mental retardation and more.

5)Don't refer to copyrighted documents. Release or rewrite the explanation for all changes and make them public. People should not have to pay hundreds of dollars to see what's being considered.
