Dear Secretary,

Dear NRC Commissioners and Staff:

NRC's Radiation Standards, 10 CFR 20, does not safely protect the environment and its inhabitants from the radioactivity released from the nuclear power fuel chain, its uranium mills, fuel factories, waste dumps and processors. Radioactive releases should be eliminated.

The cancer risks from the current standards are unacceptable. Pay attention to the danger to our gene pool and reproductive phase of our lifecycle also.

1)Eliminate the legal radioactivity permitted to be released into air and water; never increase them again. NRC risk numbers show current levels could be causing 1 in 286 men, 1 in 190 women and 1 in 41 baby girls to die from cancer.

2)Stop the additional radioactive releases to sewage. Delete Table 3 of Appendix B of the current rule. On top of high risks from air and water emissions, NRC allows discharges into sewage that can give doses of 500 MORE millirems per year!

3)Protect worker rights and privacy.

4)It's time to acknowledge radiation causes health problems other than cancer and protect against those as well: including heart disease, reduced immunity, mental retardation and more.

5)Don't refer to copyrighted documents. Release or rewrite the explanation for all changes so you can make them public. People should not have to pay hundreds of dollars to see what's being considered when you are paid to protect them and are only in existence because of the public's mandate thru Congress.

Thank you for your time.

Paul Graves
