General Comment

the nrc wants to do away with transparency and public comment? i have a better idea. How about "we the people" do away with the NRC in it's entirety? if the average citizen did the dismal job at their work that the members of the NRC do at theirs, they would be fired. The agency has FAILED to protect the people from the radioactive filth emitted from this industry of death and even worse, they have protected the industry from any public debate as to how to move forward. We read in the FOIA documents how worried you all were about having enough potassium iodine to protect you and your loved ones whilst lying to the rest of us about the dangers, allowing our children to walk in radioactive rain, allowing our children to be exposed to dangerous amounts of radiation. How many lives of children did you sacrifice for general electric and their death machine? shame shame shame on all of you. there will be a special place in hell for all of you and you will ALL be held accountable!!!!
