

Secretary, U.S. Nuclear Regulatory Commission
301-415-1101

Subject: ~~Revised~~ ID NRC -2011-0012

Comments on 10CFR Part 61 Proposed Rule

It is our understanding that no way exists to neutralize the radiation given off by the waste by-products of nuclear facilities, either from the commercial use of nuclear fission in the generation of electricity.

The waste products of both types of nuclear operations require isolation from human beings, animals and plants life for hundreds, thousands, hundreds of thousands of years and longer.
