## General Comment

Please explain how radiation treatment for cancer in the 80s gave my grandmother a lethal brain tumor. Please explain how my mother was diagnosed with cancer so they irradiated her to kill part of it and then she got a lethal brain tumor last year (2014). Please explain how these people submitting the these requested rule changes do not have a HUGE conflict of interests. Please explain how hormesis works when Radon actually causes cancer with long term low dose exposure. How does hormesis work on a human fetus?
