Re: Oconee Nuclear Station
Docket Nos. 50-269, -270, -287
Valve Wall Thickness Measurements

Dear Mr. Moseley:

On March 1, 1974, Duke Power Company met with representatives of your staff to discuss the pressurizer power-operated relief valves at Oconee Nuclear Station. In that meeting, we agreed to supply additional information concerning the acceptability of these valves. Therefore, please find attached a March 24, 1974 amendment to Report No. 1143, "Resolution of Acceptance of Electromatic Relief Valves IRV-67 (RC-66)," and a March 23, 1974 amendment to "Evaluation of Weld Joint Design on Soundness and Integrity of Weld and Base Metal in Electromatic Relief Valves IRV-67 (RC-66)."

This information supplements the above-mentioned reports which were transmitted to you on November 30, 1973. We believe that this information is sufficient to demonstrate the acceptable operability of the pressurizer power-operated relief valves.

Very truly yours,

A. C. Thies
