Re: Approval for Cameco Resources Mine, Permit No. 633, to Conduct Natural Attenuation Cross-Hole Test In Mine Unit 7.

Dear Mr. Garoutte:

This letter approves your request to conduct your Cross-Hole Natural Attenuation Test in Mine Unit-7. Your request was received under your cover letter dated July 1, 2015. As stated in this letter this test will be conducted prior to mining Mine Unit 7 in the area controlled by Header House 7-7 to gather better data related to the natural attenuation of the aquifer.

This research proposal will be inserted into Volume VI, Research/Investigation Projects.

Please feel free to contact me if questions or concerns arise.

Respectfully,

Miles Bennett

Uranium Coordinator
