General Comment

Radiation is good for you?

You are clearly out of your mind.

Talk to Dr. Curie about how good radiation is for you...

You are criminals if you actually are trying to push this concept:

The radiation hormesis model provides that exposure of the human body to low levels of ionizing radiation is beneficial and protects the human body against deleterious effects of high levels of radiation.

This is the most unscientific approach to radiation I've ever seen.

It has been shown, time and time again, that radiation is a killer, that it causes mutations and cancers.

It is not a GREEN energy source. It is not safe. It is not sustainable.
